

# Build own nextcloud container

in case [https://hub.docker.com/\\_/nextcloud/tags](https://hub.docker.com/_/nextcloud/tags) got long time without updates (like 28.0.3 version for example

this is the way to create your own container with new version

```
git clone https://github.com/nextcloud/docker.git
cd docker/28/apache
docker build -t nextcloud .
```

```
