4K UHD Dash Cam with GPS,
Wi-Fi & Anti Glare Polarising Filter

Endorsed by

AA

Specification:

NEXT BASE
Dash Cams

4K UHD recording at 30fps to provide world leading footage quality.
Can also record 1440p at 30fps and 1080p at 60fps.

Ultra wide viewing angle to capture all the action on both sides of the road.

GPS records location and speed data to view on Google Maps™ using the NEXTBASE Replay 3™ software.
Also play, edit and share your footage using the Replay 3 software. (Windows 7 or later/OSX 10.7 or later required)

Click & Go powered magnetic car mount to easily install and remove your Nextbase Dash Cam.

Innovative polarising filter to remove windscreen glare and reflections, ensuring the best picture quality possible.

Utilises the very latest Sony EXMOR R™ CMOS sensor to provide unparalleled image clarity.

Intelligent Parking Mode to automatically record when motion is detected. Keep your car safe when parked.

Wi-Fi - Easily play and share your videos on your smartphone or tablet using the free Nextbase Cam Viewer™ App
Compatible with Android and Apple smartphones and tablets.

Time Lapse allows you to take snapshots of a long journey and create short videos of your trip.

Auto Dimming - The screen dims automatically at night.

High Dynamic Range increase the image contrast and colour range to provide optimum image quality for both day and night recordings.

Spoken word announcements to clearly identify when key functions are activated.

NEXTBASE
Dash Cams

Please Note:

The default resolution setting on the 612GW is 4K.

In order to record video in full 4K a fast write speed MicroSD card is required.
Minimum of U3 standard, which exceeds the normally available Class 10 SD cards.

A Nextbase 64GB U3 card is recommended.

To play back 4K video on a PC or laptop you will need a fast machine to process the large files.

If you need to reduce the recorded file size to prevent playback problems,
go to the Settings, select Resolution and change this to 1440p or 1080p.
