

# squid proxy in docker

## Start squid

```
docker run --name squid -d --restart=always --publish 3128:3128 --volume /docker/squid/cache:/var/spool/squid3 sameersbn/squid:latest
```

## See the logs

```
docker exec -it squid cat /var/log/squid3/cache.log
docker exec -it squid tail -f /var/log/squid3/access.log
```
