

Customize device without firmware hack

Change boot logo

Place file **D:\SYS\on_logo.jpg** 320x240 on SD Card.

First boot image will be copied. Second boot it will be visible.

Change poweroff logo

Place file **D:\SYS\off_logo.jpg** 320x240 on SD Card.

First boot image copien and visible on the first power off.

Update speedcam db

Place **D:\gpsdb.txt** and power on the device

Text logo on video

Place file **D:\SYS\logo.txt**

 not work if graphical logo used

Autoexec scripts

```
a:\autoexec.ash  
b:\autoexec.ash  
c:\autoexec.ash  
d:\autoexec.ash  
e:\autoexec.ash  
f:\autoexec.ash  
g:\autoexec.ash  
l:\autoexec.ash  
z:\autoexec.ash  
a:\autoexec.tcl  
b:\autoexec.tcl  
c:\autoexec.tcl  
d:\autoexec.tcl  
e:\autoexec.tcl  
f:\autoexec.tcl  
g:\autoexec.tcl  
l:\autoexec.tcl  
z:\autoexec.tcl
```
