

Additional settings for Jenkins

Should be OK if installed with OS package manager in other cases may need to be checked

Something that may need to be done for Linux Slaves

user limits

limits.conf

| | | | |
|---------|------|--------|------|
| jenkins | soft | nofile | 4096 |
| jenkins | hard | nofile | 5120 |
| jenkins | soft | nproc | 2048 |
| jenkins | hard | nproc | 3072 |

some additional software

```
# Main Jenkins job is using this to parse Jenkins output
yum -y install libxslt.x86_64

# To work with git
yum -y install git
git config --global user.email "jenkins@build.example.com"
git config --global user.name "Jenkins"

# unzip must be available
yum install unzip

# To be able execute Ansible playbooks
yum -y install ansible

# To be able to use password login with Ansible
yum -y install sshpass
