

Cleanup Artifactory example script

```
#!/bin/bash
#Year to delete
year=2015
echo "Cleanup Artifactory from $year year artifacts"
for artifactId in `curl -u user:password http://artifactory.example.com:8081/artifactory/libs-release-local/com
/example/product/ 2>/dev/null |grep "href"|grep -v '\.\.' | cut -d\> -f2|cut -d\< -f1 |cut -d/ -f1`;
do
    echo "Removing old $artifactId"
    for item in `curl -u user:password http://artifactory.example.com:8081/artifactory/libs-release-local/com
/example/product/$artifactId/ 2>/dev/null |grep $year| grep "href"|grep -v '\.\.' |grep -v maven-metadata.
xml|cut -d\> -f2|cut -d\< -f1`;
    do
        echo removing $artifactId version $item
        curl -u user:password http://artifactory.example.com:8081/artifactory/libs-release-local/com/example
/product/$artifactId/$item;
    done
done
```

Clean Trash Can and Execute Garbage Collection on Artifactory web interface after the script to speed up free space.
