

gradle publish to artifactory

1 st example

build.gradle

```
apply plugin: "maven-publish"
publishing {
    publications {
        maven(MavenPublication) {
            artifact("test-text.tar.gz") {
                extension "tar.gz"
            }
            groupId 'info.liutyi'
            artifactId 'test-text'
            version '1.0'
        }
    }
    repositories {
        maven {
            credentials {
                username 'user'
                password 'password'
            }
            url "https://artifactory.project.example.com/artifactory/libs-release-local"
        }
    }
}
```

```
gradle publish
```

2-nd example

build.gradle

```
apply plugin: "maven-publish"

publishing {
    publications {
        maven(MavenPublication) {
            artifact("${artifact_filename}") {
                extension "${artifact_ext}"
            }
            groupId "${artifact_groupid}"
            artifactId "${artifact_id}"
            version "${artifact_version}"
        }
    }
    repositories {
        maven {
            credentials {
                username 'user'
                password 'password'
            }
            url "${artifactory_url}"
        }
    }
}
```

gradle.properties

```
artifactory_user = user
artifactory_password = password
artifactory_url = https://artifactory.project.example.com/artifactory/libs-release-local
artifact_filename = test-text.tar.gz
artifact_ext = tar.gz
artifact_groupid = info.liutyi
artifact_id = test-text
artifact_version = 1.0
```

```
gradle publish
```
